

Ryuhei Miyazato

zackt0810@gmail.com | ryuhei-miyazato.github.io

I am an AI safety researcher at Japan AISI, where I contribute to a team evaluating AI safety in Japanese, with a particular focus on robustness to misinformation/disinformation and hallucination generation. I also work as a researcher at UEC, focusing on improving the robustness of probing-based hallucination detection methods.

Education

The University of Electro-Communications, Tokyo, Japan <i>M.Eng. in Computer Science</i> – Design Thinking and Data Science Program	April 2024 – March 2026
The University of Electro-Communications, Tokyo, Japan <i>B.Eng. in Computer Science</i> – Specialty in Management Science and Engineering	April 2020 – March 2024

Experience

Researcher — Japan AI Safety Institute, Tokyo, Japan - Evaluation for Hallucinations Related to Misinformation Generation in Japanese LLM - Post-training for Improving Abstention Capability of LLM	May 2026 – Present
Research Associate — UEC, Tokyo, Japan Probing-based Hallucination Detection in VLM Using Multiple Internal Representations	May 2026 – Present
Research Intern — Ichikara Inc., Tokyo, Japan Data Synthesis and Evaluation for Japanese LLM	April 2025 – April 2026
Research Intern — DOCOMO Innovations Inc., California, U.S.A. - Personalized Book Summarization with LLM - Implementation of RAG for multiple domains documents within the company.	August 2024 – November 2024

Publications

- R. Miyazato**, S. Kitada, K. Harada, "EnsemHalDet: Robust VLM Hallucination Detection via Ensemble of Internal State Detectors," Under Review / ACL2026 Student Research Workshop, July 2026
- R. Miyazato**, T. Wei, X. Wu, H. Wu, K. Harada, "BookAsSumQA: An Evaluation Framework for Aspect-Based Book Summarization via Question Answering," IJCNLP-AAACL 2025 Student Research Workshop, November 2025
- Y. Nakamizo, **R. Miyazato (co-first author)**, H. Tanabe, R. Yamakura, K. Hatanaka, "Ensembling Multiple Hallucination Detectors Trained on VLLM Internal Representations," KDD Cup Workshop at KDD2026, August 2025
- R. Miyazato**, T. Nishino, K. Harada, "Book Recommendation System in University Libraries Considering Course Subjects and Users' Learning Situation," Information Processing Society of Japan Transactions on Mathematical Modeling and its Applications, 18 (1), 1–9, February 2025

Conference Presentations

- R. Miyazato**, "Hallucination Detection in Large-Scale Vision-Language Models via Probing and Ensemble Learning," The Association for Natural Language Processing (NLP2026), March 2026
- R. Miyazato**, "Examining the Temporal Reasoning Ability of Language Models in Non-linear Narratives," Young Research Association for NLP Studies (YANS2025), September 2025
- R. Miyazato**, "Aspect-Based Novel Summarization with Relational Extraction Using Large Language Model," Japanese Society for Artificial Intelligence (JSAI2025), May 2025
- R. Miyazato**, "Book Recommendation System for University Libraries," SIG Mathematical Modeling and Problem Solving: MPS, June 2024

Awards

Student Award 2026 at University of Electro-Communications Awarded to Top ~5% of Students based on Outstanding Achievements in Academic Performance	March 2026
2nd place at Ichikara-Try 2025, Ideathon on Data Synthesis for Japanese LLMs Diversity-Aware Synthesis of Post-training Data for Japanese LLMs	September 2025
5th place for Meta CRAG-MM Challenge at KDD Cup2025 Mitigate Hallucinations in MM-RAG by Ensembling Multiple Hallucination Detectors Trained on VLM Internal Representations	August 2025
